Srishti is a powerful and robust software that addresses the administrative needs of academic institutions.

With Srishti, you can do the following
- Maintain database of all the students
- Maintain all the academic elements such as branches, courses and curriculum
- Maintain the infrastructural elements such as classrooms, equipments and faculty
- Define the timetable for all courses and exams
- Maintain attendance and marks
- Calculate grades

Srishti enables all these through easy and user-friendly interfaces. Bulk upload is provided for most of the screens using pre-defined formats. Most of the screens also allow for data to be downloaded into Excel files thereby giving users the flexibility to use the data for a variety of reasons such as input to other systems, preparing ad-hoc reports etc. These features have been introduced to reduce the implementation time and help institutions derive the benefits at the earliest.

Institutions can opt to implement Srishti by choosing from the following packages depending on the need and budget

- Basic:
    - o Registration
    - o Enrolment
    - o Timetable
    - o Attendance
    - o Examination
- Advanced
    - o Faculty Advisor
    - o Orientation Course
    - o Ancillary Courses
    - o Grades
    - o Convocation
    - o Prizes and Scholarships
    - o Programme Change
    - o Research
    - o Publications
    - o Internship Evaluation
    - o Teacher Evaluation

For more information on the features or for requesting a demo / quote, please email us at Srishti@dhithi.com or call on +91 98451 96983
